DETAILED ACTION

This application has been examined. The claims 1-13 are allowed.

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a light emitting device comprising a reflecting member for reflecting light, a light guiding member arranged at the side of a light reflecting surface of said reflecting member, and a light emitting element for emitting light toward said light guiding member, characterized in that the surface of the light emitting side of said light guiding member comprises a direct emitting portion for directly passing the light emitted from said light emitting guiding member. The combination of the closest prior art of Kiyomoto (EP 1235281 A1), Suehiro et al. (US 2003/0123262) and Baba (US 6,518,691) showed a similar invention. However, they fail to teach a first total reflecting portion for totally reflecting the light emitted from the light emitting element toward said reflecting member and passing the light reflected by the reflecting member through to be emitted toward the outside of the light guiding member; and a second total reflecting portion configured so that the light emitted from the light emitting element is totally reflected toward the direct emitting portion, the light totally reflected by the direct emitting portion is directed to said reflecting member, and the light reflected by the reflecting member is emitted toward the outside of the light guiding member as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
